SWISS PRECISION, COMPETENCE AND INNOVATION

## The advantages of UltraSeam™ are obvious

# ULTRA SEAM™

THE NEW GENERATION OF AWNINGS.

Dear Sir or Madam

Before we provide you with the latest information on UltraSeam™, we wish you all the best for the start of the new decade, especially good health, success and satisfaction.

The UltraSeam™ technology has established itself among the awning manufacturers who use this technology. This is the result of the visit of the Glaswelt editor Olaf Vögele together with our Sales Manager Sascha Hanft to a renowned Jentschmann customer.

With UltraSeam™ the appearance of the awning is more attractive. The importance of a stable fabric tube has been confirmed in practical use. Many manufacturers have therefore revised their system technology to reduce the deflection of the fabric tube.

Not only the technical specifications are important for the customers, but also a good after-sales service. At Jentschmann the customers can rely on the high quality and fast support. This reliability has a high value for the customers.

In the report of Olaf Vögele, which can be read in the [Glaswelt issue 12-2019](#), many interesting details are described, which advantages the customer sees with Jentschmann and with the UltraSeam™ technology.
